

VirtuJudge

Pitch Simulator

Your AI-Powered Judging Panel

Problem

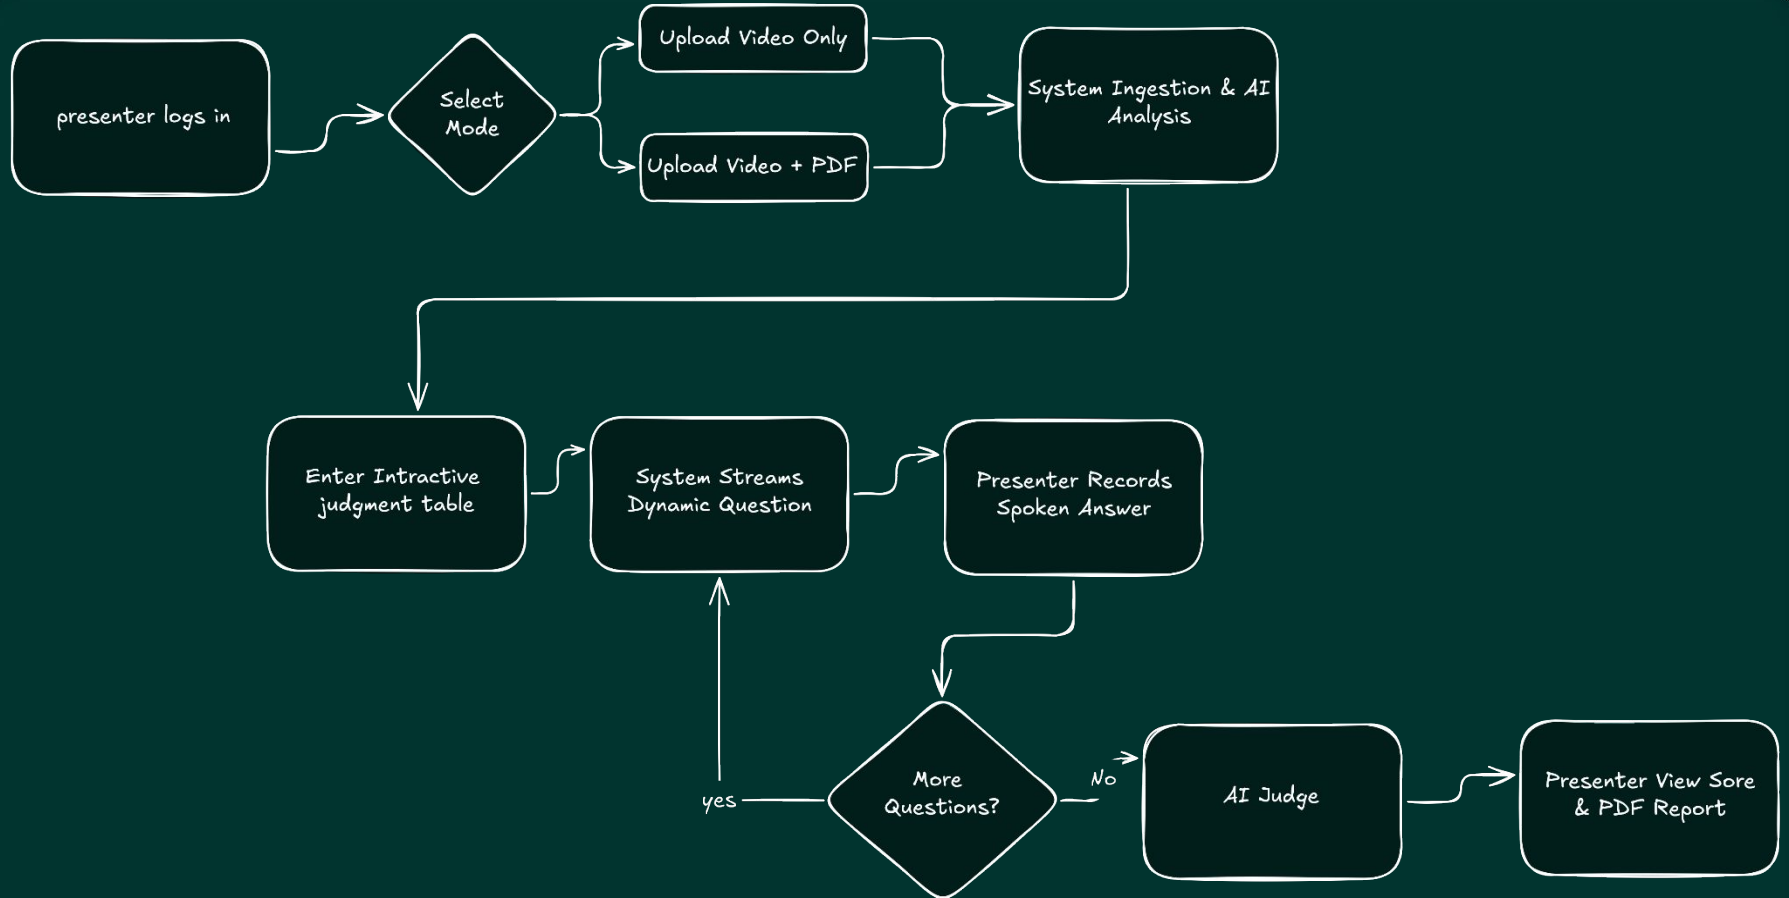

Many people struggle with their presentation skills and are actively looking for ways to improve them. One traditional solution is to find a friend or an expert in public speaking to present in front of, allowing them to take notes on your performance and track your movements. However, finding someone with the right expertise and available time can be difficult. Another option is to find a training center or hub that offers presentation courses, but high-quality programs are often rare, geographically distant, or simply too expensive.

Solution

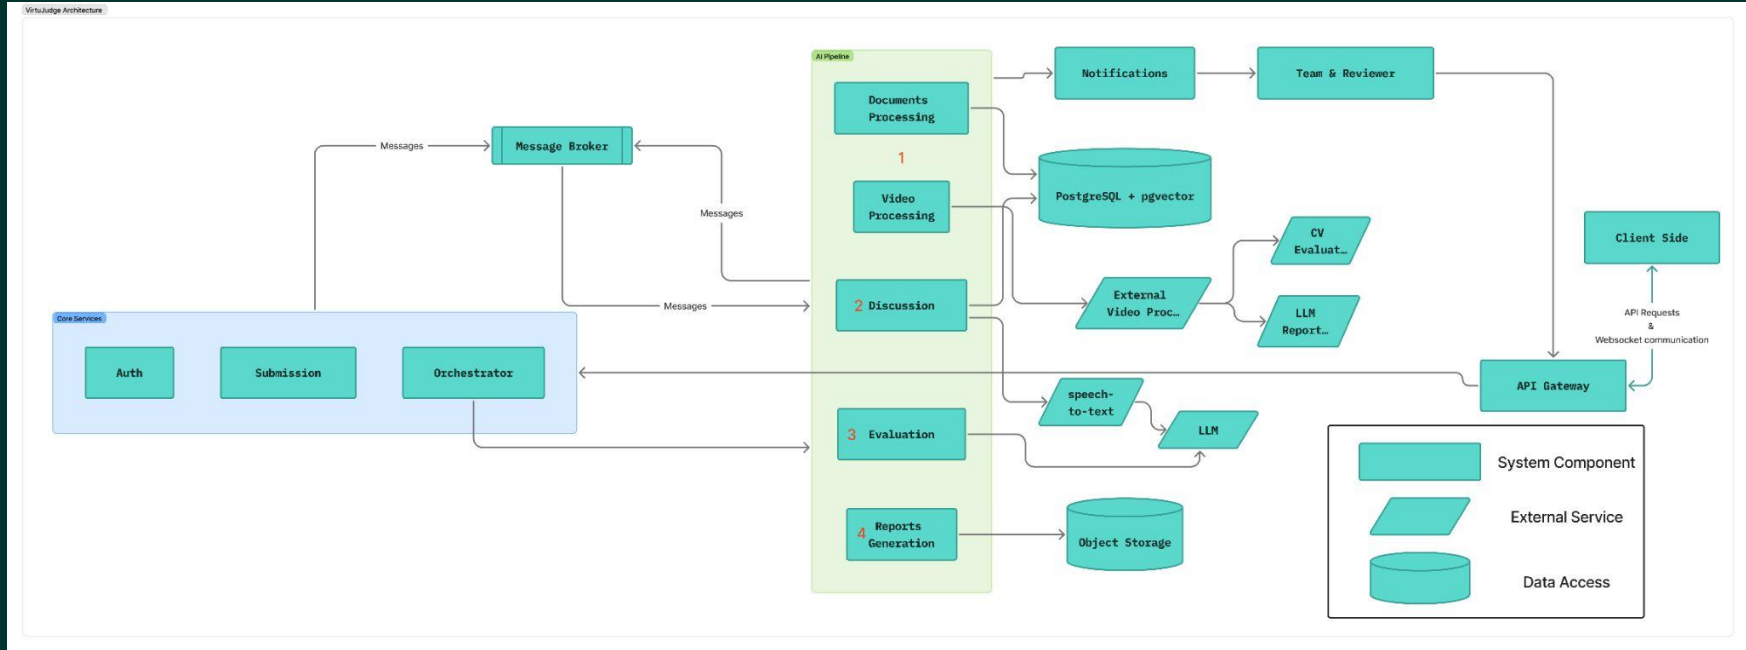

VirtuJudge is an AI-Powered platform specialized for training, preparing for pitch decks in front of AI, with a specialized feedback each time the team tries.

How The AI Functions

AI Pipeline

Orchestrator

Speech Analysis

- Transcript
- Content
- Filler Words
- Speaker Recognition

Vision Analysis

- Body Language
- Eye Contact
- Posture
- Gestures
- Facial Behavior

Audio Features

- Speech Rate
- Pitch
- Energy
- Pauses
- Arousal

Vision & Audio

- STT: Whisper Large V3 Turbo for fast transcription and word-level timestamps
- Speaker Diarization: pyannote Community-1 identifies and separates speakers
- Vision: MediaPipe Pose + Face Landmarker for posture, movement, and gaze
- Audio: Librosa extracts speech-delivery metrics such as rate, pauses, fillers, and pitch

The Interactive Loop

Real Time QA

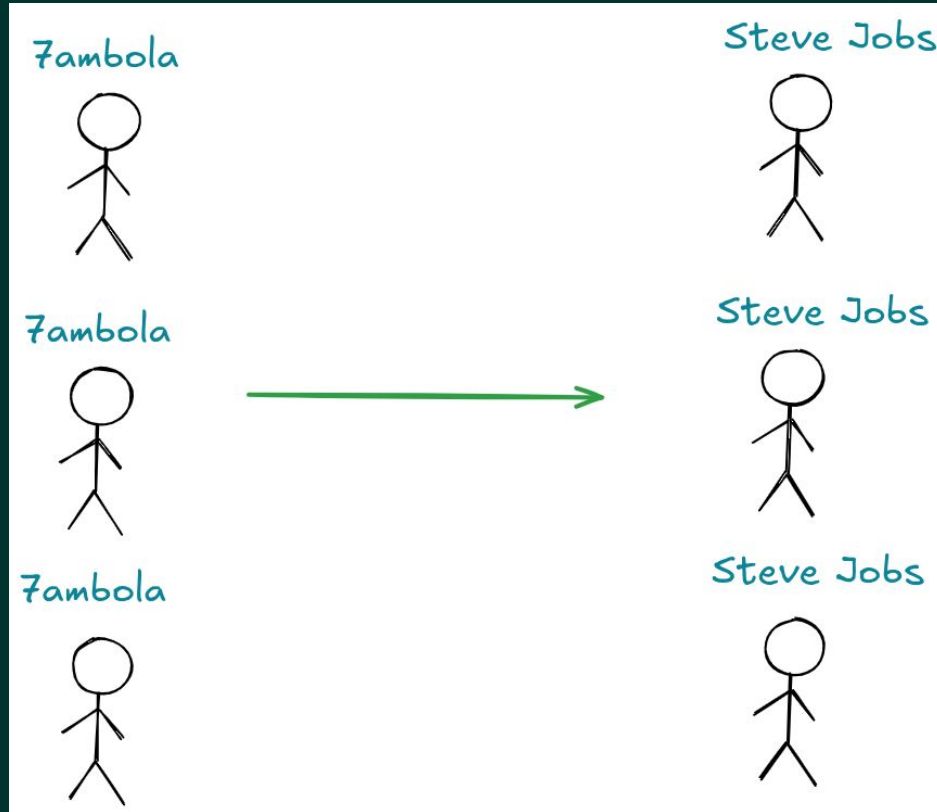

- Feature Aggregation: Combines vision, speech, and audio data using synchronized timestamps
- RAG: Retrieves relevant information from uploaded project documents to ground the evaluation in the team's data
- AI Judge Panel: Multiple LLM-based judges evaluate the pitch, ask questions, analyze answers, and generate follow-up questions

Final Output

Score / Feedback & Final Report:

- Individual Metrics: Performance of each team member
- Delivery Data: Visual and speech-delivery metrics
- Factual Consistency: Verification of claims against uploaded documents
- Q&A Defense: Evaluation of responses to follow-up questions
- Actionable Steps: Specific recommendations for the next practice
